

Announcing Energy Efficient Solar Installation at Decatur Self Storage

The owners of **Decatur Self Storage** are pleased to announce the installation of 100KW Solar Panels on our facility. The Solar Project provides in excess of 100% of the electricity needs of the storage facility. **Decatur Self Storage** is the only fully solar storage facility in Georgia.

More about Decatur Self Storage

Continuing the adaptive reuse of a 1947 manufacturing/warehouse building with a self storage facility, the owners have strived to preserve the existing structures while improving the energy profile through insulation, installation of energy efficient lighting fixtures and upgrading the HVAC systems.

Now, with the installation of the Solar panel system, 100% of the electric needs of **Decatur Self Storage** (which includes climate-controlled units) are provided through this renewable energy source.

Since 1999, **Decatur Self Storage** has provided a locally owned and managed facility for residents and businesses in Decatur and surrounding areas. Though there are other self storage facilities in the area, none offer the location and convenience advantages of **Decatur Self Storage**. All storage units are on ONE level and are enclosed, providing protection from the elements. Dock high loading with tractor trailer access, has proven a great attraction for our business clients and those residential clients in the process of relocation. **Decatur Self Storage** features both climate-controlled and non-climate spaces, as well as fenced and access-controlled outside parking spaces for vehicles and RV's.

No other storage facilities in the area offer the combination of convenience, location, access and green technology provided at **Decatur Self Storage**. As a prospective tenant, you will find that our prices are very competitive and in many instances significantly lower than the chain-owned storage facilities.

How do we do it? As Decatur residents ourselves, we developed, own and manage the storage facility. We do not have to answer to a regional manager or corporate office, but can be responsive to your needs immediately as on-site owners. When you lease with us, you will not only receive convenient and more affordable storage, but are also helping to conserve energy and reduce the carbon profile.

Perhaps there will be other solar powered self storage facilities in the future, but as of now **Decatur Self Storage** is the only one in Georgia. Please come by for a tour. We welcome inquiries. Let **Decatur Self Storage** be your storage source in Decatur, East Atlanta, Druid Hills, Avondale Estates and surrounding areas.
